Introduction:

This document will serve as a quick start guide to help a new user understand how to start tracking their logistics costs for transporting food items between farms, food-hubs and retail locations. The application is currently hosted at: <https://food.opliva.com/> visit this link to get started.

Creating an account:

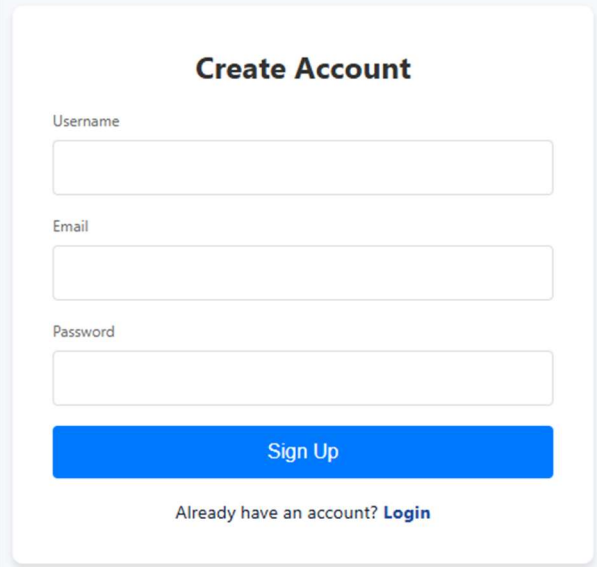

Registration:

1. visit the website: Food.Opliva.com
2. Click the Sign up link highlighted in Figure 1 (alternatively you can try the application anonymously this is covered by the section: “Try Anonymously and Upgrade Account”)
3. This will bring you to the registration page shown in Figure 2 below.
4. Select a Username
5. Enter your Email
6. Enter an appropriate password (at least 10 characters long)
7. Click “Sign Up”

The login screen features a white background with a light blue border. At the top, the title "Sign In" is centered in bold black text. Below the title are two input fields: "Username" and "Password", each with a light gray border. A blue button labeled "Login" is positioned below the password field. At the bottom, the text "Don't have an account?" is displayed, followed by a red box containing the text "Sign up" and the text "OR Try Without an Account" and "Forgot password?" in blue.

Figure 1: Login screen @ Food.Opliva.com

The registration page has a white background with a light blue border. The title "Create Account" is centered at the top in bold black text. Below the title are three input fields: "Username", "Email", and "Password", each with a light gray border. A blue button labeled "Sign Up" is located below the password field. At the bottom, the text "Already have an account? Login" is displayed in blue.

Figure 2: Registration Page

Setting up TOTP/Authenticator application:

Once you have registered you will be taken to a screen to set up a TOTP authentication app. This application is used any time you need to reset your password so that you don't get locked out of your account if you forget your password.

QR Code Setup:

1. Open your preferred TOTP authenticator application (Google Authenticator, Microsoft Authenticator, Etc.)
2. Find the button for adding a new account (for Google authenticator it is the "+" button in the lower right corner, For Microsoft Authenticator it is the QR code image in the lower right corner).
3. Select the option to "Scan a QR code" if prompted.
4. Point your camera at the QR code shown on your device screen.
5. This will generate a new account in your authenticator application named: Username @ Oregon Food Supply Chain with a 6 digit code generated every 30 seconds.
6. Enter this 6 digit code into the text box at the bottom of the application and click "Confirm"
7. You should now be directed to the main dashboard. NOTE: If you are having trouble and the 6 digit code is not verifying make sure your device times for the device with the authentication application and the device visiting the website. Also make sure the 6 digit code you are entering has not yet expired.

Manual Setup:

1. Open your preferred TOTP authenticator application (Google Authenticator, Microsoft Authenticator, Etc.)

Set Up Your Authenticator

Scan this QR code with your authenticator app:

1. Open your authenticator app
2. Tap + or **Add account**
3. Choose **Scan QR code**
4. Scan the QR code above

Or enter this key manually:

Y44EEXPQIMXYMZVIFTWBPCFBWDCUGC

Copy key

1. Choose **Enter a setup key**
2. Account name: **Choose an appropriate label (Tip: include your username)**
3. Key: paste the key above
4. Select: **Time-based** (default)

Enter the 6-digit code from your app to confirm

000000

Confirm

Figure 3: Authenticator Setup

2. Find the button for adding a new account (for Google authenticator it is the “+” button in the lower right corner, For Microsoft Authenticator it is the QR code image in the lower right corner).
3. Select “Enter a setup key” on Google Authenticator or “Enter code manually” on Microsoft authenticator.
4. Enter the 32-character code in the middle of the “Setup Your Authenticator” into your authenticator application (alternatively if you are using the same device for the authenticator and the logistics calculator you can simply click “Copy key” and paste into the authenticator application).
5. Select an appropriate name for this key in your authentication application. We suggest including your username so you don’t forget.
6. Once the account is created you will have a 6 digit code in your authenticator application.
7. Enter this 6 digit code into the text box at the bottom of the application and click “Confirm”
8. You should now be directed to the main dashboard. NOTE: If you are having trouble and the 6 digit code is not verifying make sure your device times for the device with the authentication application and the device visiting the website. Also make sure the 6 digit code you are entering has not yet expired.

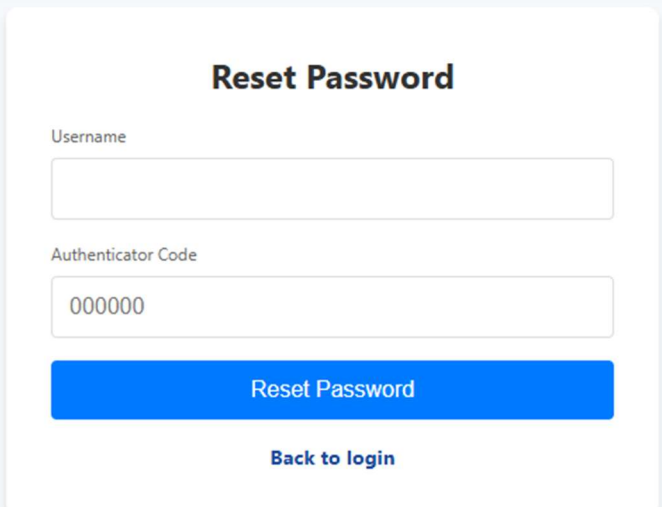

Logging In and Password Recovery:

Signing In:

1. From the Sign In Screen (Figure 1)
2. Enter your username (not your email)
3. Enter your password
4. Click “Login”

Password Recovery:

1. From the Sign In Screen (Figure 1)
2. Click “Forgot password?”
3. You will then land on the screen in Figure 4

Reset Password

Username

Authenticator Code

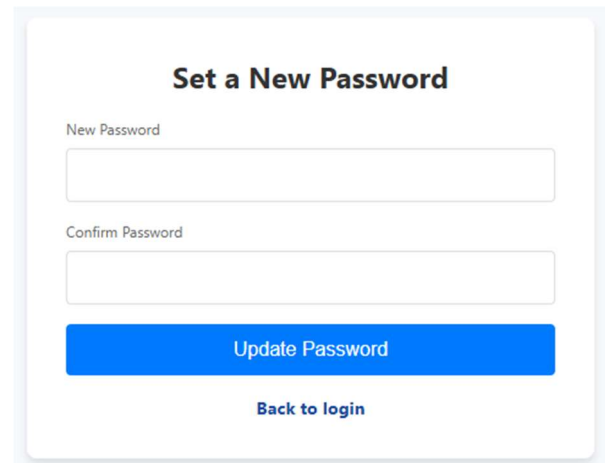

000000

Reset Password

[Back to login](#)

Figure 4: Password Reset Authentication Screen

4. Enter your Username and 6 digit Authenticator code from your authenticator application (See: “Setting up TOTP/Authenticator application”)
5. You will then see the screen in Figure 5 where you enter in a new password two times and click “Update Password”
6. You will then be brought back to the main Sign In screen (Figure 1) Where you can sign in with your new password.

The screenshot shows a 'Set a New Password' form. It has a title 'Set a New Password' at the top. Below the title are two input fields: 'New Password' and 'Confirm Password'. Below these fields is a blue button labeled 'Update Password'. At the bottom of the form is a link labeled 'Back to login'.

Figure 5: Password Reset Screen

Try Anonymously and Upgrade Account Using the application:

The main calculator can be used without an account if you are interested in trying it out before creating an account. An anonymous account is valid for 7 days from your last interaction with the application and an anonymous account can be upgraded at any time without any data loss.

WARNING: After 7 inactive days or if you delete your browser cookies your account will be disabled and the data will be lost.

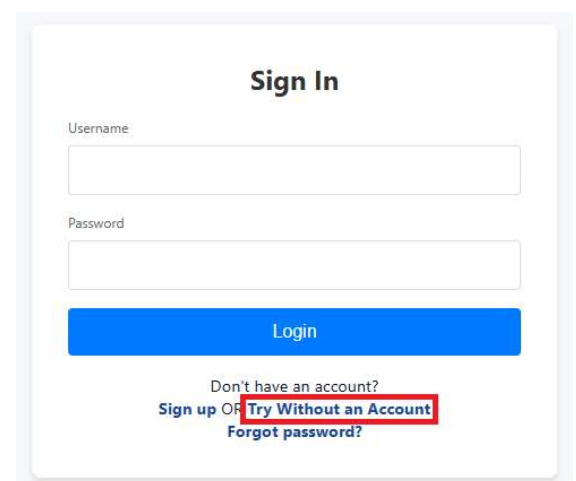

Trying the Application with an Anonymous Account

To start with an anonymous account:

1. Simply click the highlighted button in Figure 6 from the main Sign In screen
2. Done! This will take you to the main dashboard (Figure 8) but with the banner shown below (Figure 7)

Getting Back into Your Anonymous Account

If you still have a valid anonymous account (less than 7 days since your last use and a valid cookie) you may still be directed to the Sign In page. To get back into your anonymous account:

The screenshot shows a 'Sign In' form. It has a title 'Sign In' at the top. Below the title are two input fields: 'Username' and 'Password'. Below these fields is a blue button labeled 'Login'. At the bottom of the form are three links: 'Sign up OR Try Without an Account' and 'Forgot password?'. The 'Try Without an Account' link is highlighted with a red box.

Figure 6: Sign In page

1. Click “Try Without an Account” (Figure 6)
2. Done! You will load back into your anonymous account with no data lost.

Upgrading Your Anonymous Account

If you have entered data into an anonymous account you can at any point upgrade this account to a full permanent account so you don’t have to worry about data loss.

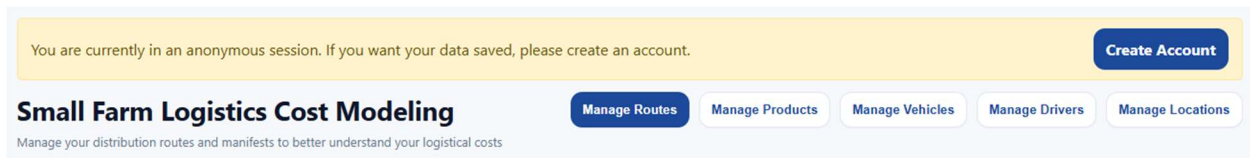

Figure 7: Anonymous Account Header

1. Click the “Create Account” button on the header of your anonymous account’s main dashboard (Figure 7)
2. Follow the account creation steps outlined in “Creating an Account” above.
3. You now have a permanent account with login credentials. This account will have all the same data entered from your anonymous account preloaded.

Figure 8: The main dashboard

Once you are successfully logged in you will be see an overview of all the current routes. If this is your first time logging in to this screen will be blank. Below is an overview of the information in each column of this main dashboard.

1. DATE: The date this route was created in the system
2. ROUTE: The route number and route name
3. START → DESTINATION: The name of the starting location and ending location
4. PRODUCTS: an overview of the first 2 items in the manifest for that route with a “Manage load” button for quickly adding or editing manifest items.
5. REVENUE:
 - a. Entered: The estimated revenue entered when creating a route
 - b. Items: The calculated revenue from the manifest
6. TOTAL COST: The total cost of goods based on product manifest + total transport cost
7. NET PROFIT: The REVENUE (Items revenue calculated from manifest) – TOTAL COST

8. ACTIONS:
 - a. Edit: edit the route specifics
 - b. View: view route details

The Route Details

Route Overview

To view the detailed summary of a route simply click the “View” button on the row of the route you would like to view the details of. This will take you to that routes details.

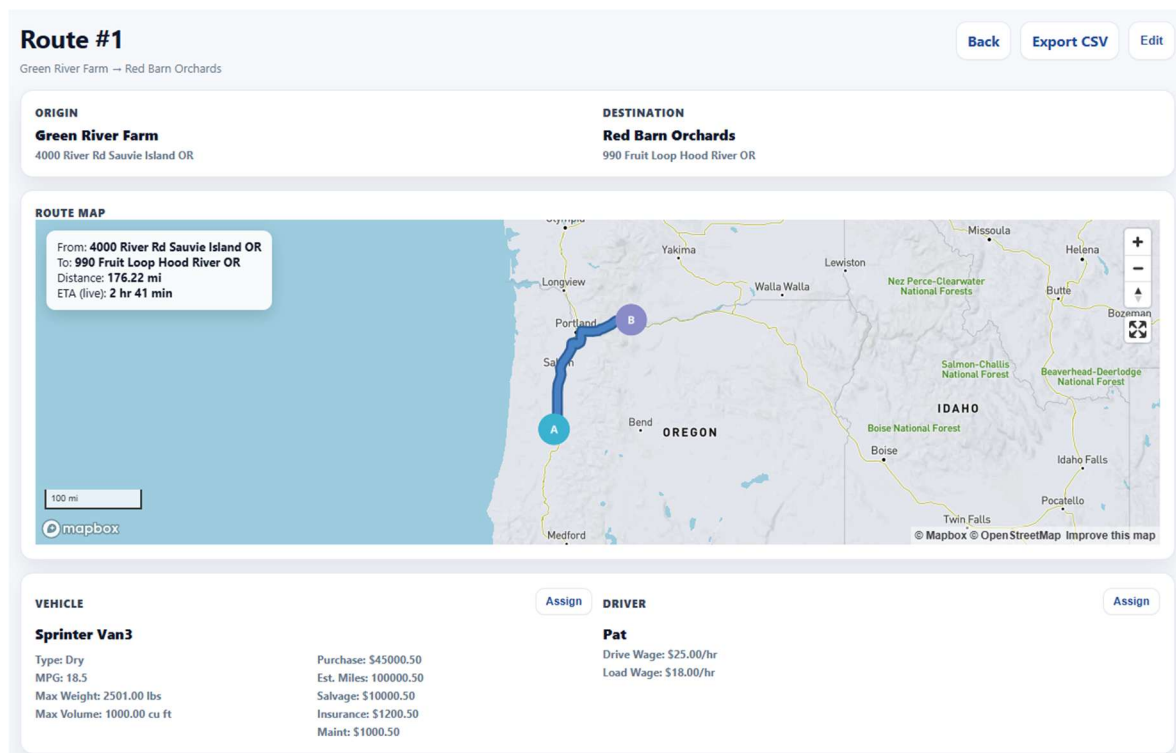

Figure 9: Route Details 1 (overview)

- At the top of the screen you will see the route number and name
- Below this you can see the ORIGIN and DESTINATION names and addresses
- Below the addresses there is a map showing the entire route
- Below the map you can see details about the specific truck and driver who are running that route

Financial Metrics

Below the route overview details there is a card showing financial metrics for that specific route

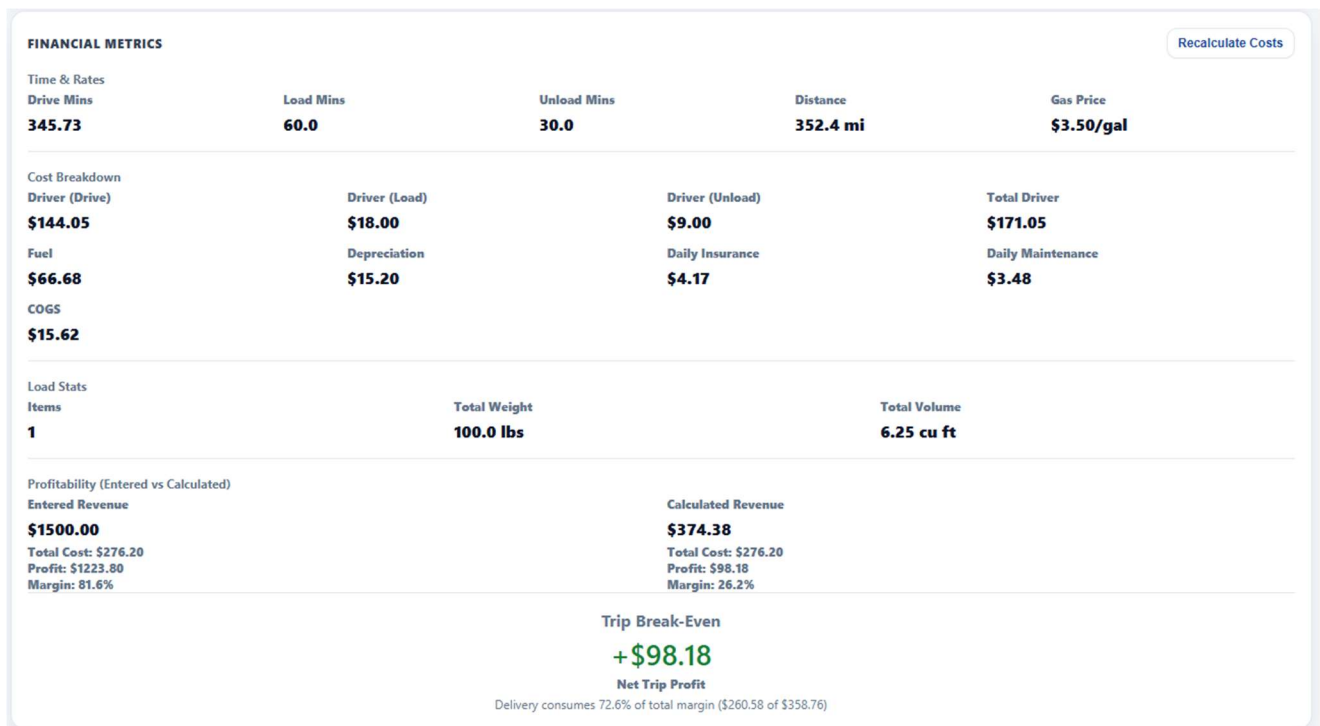

Figure 10: Route Details 2 (Financial Metrics)

Time and rates

NOTE: Time and rates are all calculated based on round trip distance and show the cost for getting to the drop off location and back to the starting point.

- Drive Mins: Estimated total number of minutes spent driving round trip.
- Load Mins: Estimated total number of minutes spent loading (set based on origin location, see “Location Management” section)
- Unload Mins: Estimated total number of minutes spent unloading (set based on destination location, see “Location Management” section)
- Distance: Total number of round-trip miles for this route
- Gas Price: Gas Price estimate for this route (entered at route creation, see “Route Management”)

Cost Breakdown

- Driver (Drive): The estimated total cost of the drivers drive wage for this route (round trip)
- Driver (Load): The total estimated cost of the drivers load wage for this route
- Driver (Unload): The total estimated cost of the drivers unload wage for this route
- Total Driver: The total estimated driver wage for this route (Driver (Drive)+Driver (Load) + Driver (Unload))

- Fuel: The total fuel cost for this route ((Distance/VehicleMPG) * Gas Price)
- Depreciation: Calculated using a useful vehicle life of 8 years and the following formula:
 - $$\frac{\text{VehiclePurchasePrice} - \text{VehicleSalvageValue}}{(\text{ExpectedAnnualMilage} * 8)} * \text{RouteDistance}$$
- Daily Insurance: Calculated using the following formula
 - $$\frac{\text{AnnualInsuranceCost}}{\text{ExpectedAnnualMilage}} * \text{RouteDistance}$$
- Daily Maintenance: Calculated using the following formula
 - $$\frac{\text{AnnualMaintenanceCost}}{\text{ExpectedAnnualMilage}} * \text{RouteDistance}$$

Load Stats

- Items: Total number of different SKUs or Product types in the manifest
- Total Weight: The total weight of the manifest including packaging
- Total Volume: The total volume of the manifest

Profitability (Entered vs Calculated)

Entered Revenue:

- Total entered Revenue
- Total Cost: Total cost including transport and cost of goods.
- Profit: Profit calculated based on the entered estimated revenue when creating the route.
- Margin: The percent margin based on the entered estimated revenue when creating the route.

Calculated Revenue:

- Total entered Revenue
- Total Cost: Total cost including transport and cost of goods.
- Profit: Profit calculated based on the items in the manifest.
- Margin: The percent margin based on the items in the manifest

Trip Break-Even

- Shows the profit or loss (color coded: green if profitable red if running at a loss) based on the manifest items.

Manifest

MANIFEST									
							Allocate delivery by: ☒ Weight ☐ Volume		Manage Load
PRODUCT	QTY	ITEMS/UNIT	UNIT PRICE	COST / ITEM	MARGIN / ITEM	LINE REVENUE	ALLOC. DELIVERY / ITEM	BREAK-EVEN / ITEM	LINE MARGIN
Apples	10.0	15.0	\$4.00	\$0.99	\$3.01	\$600.00	\$1.66	\$2.65	\$451.50
Carrot	5.0	30.0	\$2.20	\$0.70	\$1.50	\$330.00	\$1.48	\$2.18	\$225.00
Ground Beef	10.0	5.0	\$5.99	\$0.70	\$5.29	\$299.50	\$3.33	\$4.03	\$264.50

Figure 11: Route Details 3 (Manifest)

Each row of the manifest equates to a single SKU or product being shipped below are details about each column.

- **PRODUCT:** The entered product name or SKU
- **QTY:** The quantity of shipping units such as a case, pallet, or crate (see “Manifest Management” for more information)
- **ITEMS/UNIT:** The number of items (or pounds of product) in an individual shipping unit
- **UNIT PRICE:** The selling price of an individual item (or pound of product)
- **COST/ITEM:** The cost to the producer for an individual item (or pound of product)
- **MARGIN/ITEM:** The dollar margin for an individual item (or pound of product) (UNIT PRICE – COST/ITEM)
- **LINE REVENUE:** Total revenue for all items/pounds of that SKU/item
- **ALLOC. DELIVERY/ITEM:** The portion of the delivery cost that is allocated to each item/pound of that SKU/item in the manifest.
 - This allocation can be done by either Weight or Volume by selecting one of the “Allocate delivery by” radio buttons above the manifest.
- **BREAK-EVEN/ITEM:** The price each item would need to sell for to break even.
Calculated with the following formula:
 - $MARGIN - ALLOC. DELIVERY$
- **LINE MARGIN:** The total margin for the line calculated using the following formula:
 - $(QTY * ITEMS/UNIT) * (MARGIN/ITEM)$

Exporting CSVs

Export Overview of Routes

The overview of each route can be exported as a CSV this will produce a CSV with the following columns populated for each route on the main dashboard (Figure 8):

- Scenario ID

- Run Date
- Origin Name
- Destination Name
- Total Distance (in miles)
- Vehicle name
- Driver name
- Entered Revenue (from user entry)
- Calculated Revenue (from manifest)
- Total Cost
- Profit Estimation from Entered Revenue
- Profit Estimation from Calculated Revenue
- Margin Estimation from Entered Revenue
- Margin Estimation from Calculated Revenue
- Total Cost of Goods
- Driver Cost
- Fuel Cost
- Depreciation Cost
- Daily Insurance Cost
- Daily Maintenance Cost
- Driver Drive Cost
- Driver Load Cost
- Gas Price
- Total Weight
- Total Volume
- Line Items (Count)
- Total Drive Mins
- Load Mins
- Unload Mins

To Export this CSV simply click the “Export CSV” button from the main dashboard (Figure 8) and the CSV will begin downloading.

Exporting Single Route Details

A single route can also be exported as a CSV this single route CSV includes everything from the route overview CSV above for this individual route along with the following details for each item in the manifest:

- Product Name

- Quantity
- Items per Unit
- Unit Price (Item Price)
- Line Total
- Cost per Item
- Line Cost of Goods
- Unit Weight
- Line Weight
- Unit Volume
- Line Volume

Creating and Managing Assets

Route Management:

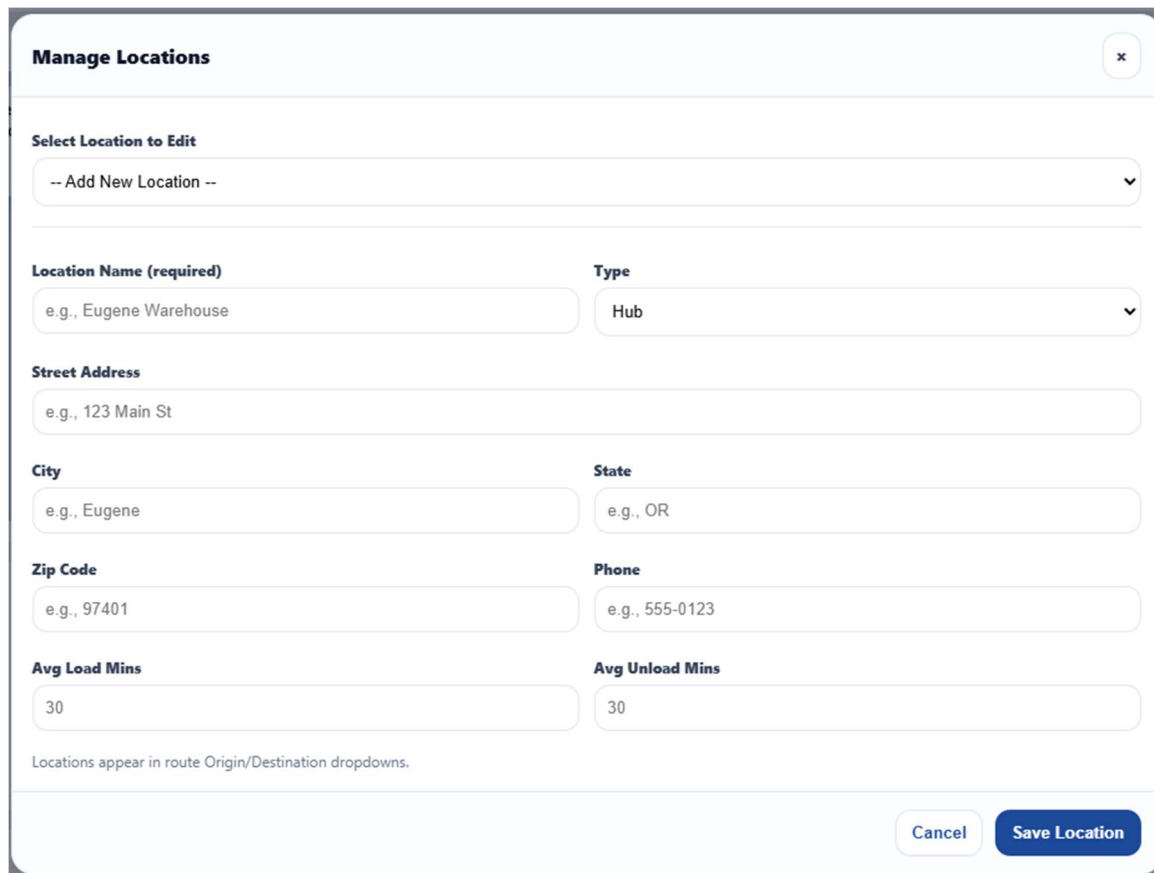

- From the main dashboard (Figure 8) click “New Route” in the upper right corner.

Figure 12: Add new route overlay

- This will open the “New Route” Overlay (Figure 12) below is an overview of each field.

- Select Route: This is a dropdown used to edit an already created route. If a route is selected the fields will auto populate and can be edited and upon clicking save they will be updated
- Route Name: This is a user created name and can be anything that helps to recognize the route at a glance.
- Sales Amount: This is a required estimate of the total revenue that this route is likely to generate.
- Gas Price (\$/gal): This is the estimated gas price on the day this route will be run.
- Start Location: This is a dropdown of saved locations. A new location can be added by clicking the “+” symbol (See “Location Management” for more information)
- Destination Location: This is a dropdown of saved locations. A new location can be added by clicking the “+” symbol (See “Location Management” for more information)
- Vehicle: This is an optional dropdown of the vehicle being used for this route. A new vehicle can be added by clicking the “+” symbol (See "Vehicle Management" for more information).
 - NOTE: If no vehicle is added the Fuel cost, Depreciation, Daily Insurance and Daily Maintenance will all be 0
- Driver: This is an optional dropdown of the driver driving this route. A new driver can be added by clicking the “+” symbol (See "Driver Management" for more information).

Location Management:

The image shows a 'Manage Locations' overlay form. At the top is a title bar with the text 'Manage Locations' and a close button (X). Below the title bar is a section titled 'Select Location to Edit' with a dropdown menu showing '-- Add New Location --'. The form contains several input fields: 'Location Name (required)' with a placeholder 'e.g., Eugene Warehouse', 'Type' with a dropdown showing 'Hub', 'Street Address' with a placeholder 'e.g., 123 Main St', 'City' with a placeholder 'e.g., Eugene', 'State' with a placeholder 'e.g., OR', 'Zip Code' with a placeholder 'e.g., 97401', 'Phone' with a placeholder 'e.g., 555-0123', 'Avg Load Mins' with a value of '30', and 'Avg Unload Mins' with a value of '30'. At the bottom of the form, there is a note: 'Locations appear in route Origin/Destination dropdowns.' and two buttons: 'Cancel' and 'Save Location'.

Figure 13: Manage Location overlay

- When a user either clicks the “Manage Locations” button at the top of any page or the “+” button next to “Start Location” or “Destination Location” in the “New Route” overlay this location management overlay will appear (Figure 12). Below are details about all the fields:
 - Select Location to Edit: This is a dropdown used to edit an already created location. If a location is selected the fields will auto populate and can be edited and upon clicking save they will be updated.
 - Location Name: This is a required location name and can be anything the user recognizes easily.
 - Type: The type of location this is. Either Food-Hub, Farm, or Store. This field is only for record keeping and does not change any functionality.
 - Street Address: The street address of the location
 - City: The city of the location
 - State: The state of the location (either abbreviated or full)
 - Zip Code: The Zip Code of the location

- Phone: The phone number of the location (only used for record keeping and does not change any functionality)
- Avg Load Mins: The average number of minutes a driver spends loading at this location (defaults to 30min)
- Avg Unload Mins: The average number of minutes a driver spends unloading at this location (defaults to 30min)

Vehicles can be assigned to routes in the Route Manager.

Cancel Save Vehicle

Figure 14: Manage Vehicles overlay

- When a user either clicks the “Manage Vehicles” button at the top of any page or the “+” button next to “Vehicle” in the “New Route” overlay (Figure 12) this vehicle management overlay will appear (Figure 14). Below are details about all the fields:

- Select Vehicle: This is a dropdown used to edit an already created vehicle. If a vehicle is selected the fields will auto populate and can be edited and upon clicking save they will be updated.
- Vehicle Name/ID: any name or ID for this vehicle that will be easily recognizable.
- Max Weight (lbs): The maximum weight this vehicle can haul in pounds(not total curb weight)
- Max Volume (cu ft): The total volume of products this vehicle can hold in cubic feet.
- MPG: The estimated miles per gallon this vehicle gets
 - Optional: if not included Fuel cost is calculated at \$0 for any route that uses this vehicle.
- Est. Yearly Mileage: The estimated number of miles this vehicle will travel in one year.
 - Optional: if not entered the Depreciation, Daily Insurance, and Daily Maintenance will be calculated at \$0 for any route that uses this vehicle.
- Purchase Price: This is the original purchase price of this vehicle (or the value of the vehicle at the beginning of an 8 year depreciation cycle)
 - Optional: if not entered Depreciation will be calculated at \$0 for all routes that use this vehicle
- Salvage Value: Estimated value of the vehicle after its 8 year depreciation cycle:
 - Optional: if not entered Depreciation will be calculated at \$0 for all routes that use this vehicle
- Annual Insurance: This is the annual insurance cost for this vehicle
 - Optional: if not entered Daily Insurance will be calculated at \$0 for all routes that use this vehicle
- Annual Maintenance: Estimated annual maintenance cost
 - Optional: if not entered Depreciation will be calculated at \$0 for all routes that use this vehicle
- Storage Type: The kind of vehicle. e.g. Refrigerated, Dry, Frozen, Multi-Temp. Used only for record keeping and does not change functionality.

Driver Management:

The image shows a 'Manage Drivers' overlay form. At the top, there's a title bar with 'Manage Drivers' on the left and a close button (an 'x' in a circle) on the right. Below the title bar, the form is divided into sections. The first section is 'Select Driver to Edit', which contains a dropdown menu with the text '-- Add New Driver --' and a downward arrow. The second section is 'Driver Name', which has a text input field containing 'e.g., John Doe'. The third section contains two text input fields side-by-side. The left one is labeled 'Hourly Drive Rate (\$)' and contains 'e.g., 25.00'. The right one is labeled 'Hourly Load Rate (\$)' and contains 'e.g., 18.50'. At the bottom right of the form, there are two buttons: a light blue 'Cancel' button and a dark blue 'Save Driver' button.

Figure 15: Manage Drivers overlay

- When a user either clicks the “Manage Drivers” button at the top of any page or the “+” button next to “Driver” in the “New Route” overlay (Figure 12) this driver management overlay will appear (Figure 15). Below are details about all the fields:
 - Select Driver to Edit: This is a dropdown used to edit an already created driver. If a driver is selected the fields will auto populate and can be edited and upon clicking save they will be updated.
 - Driver Name: The name of the driver
 - Hourly Drive Rate (\$): The rate the driver is paid for driving.
 - Hourly Load Rate (\$): The rate the driver is paid while loading or unloading.

Product Management

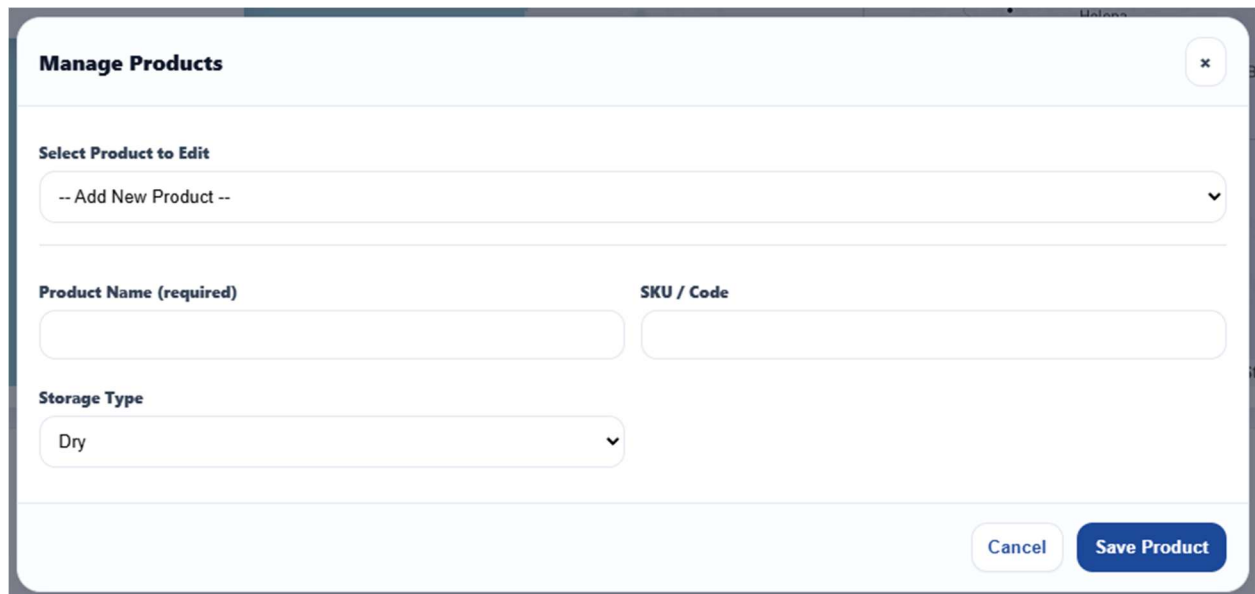

The image shows a 'Manage Products' overlay form. At the top left is the title 'Manage Products' and a close button 'x' at the top right. Below the title is a section 'Select Product to Edit' with a dropdown menu currently showing '-- Add New Product --'. Underneath this are two input fields: 'Product Name (required)' and 'SKU / Code'. Below these is a 'Storage Type' dropdown menu currently set to 'Dry'. At the bottom right of the form are two buttons: 'Cancel' and 'Save Product'.

Figure 16: Manage Products overlay

- When a user either clicks the “Manage Products” button at the top of any page or the “+” button next to “Product” in the “Manage Load” overlay (Figure 17 Below) this product management overlay will appear (Figure 16). Below are details about all the fields:
 - Select Product to Edit: This is a dropdown used to edit an already created product. If a product is selected the fields will auto populate and can be edited and upon clicking save it will be updated.
 - Product Name: A shorthand name for the product that is user readable
 - SKU/Code: This specific products code or SKU
 - Storage Type: Dropdown to select what kind of truck this product can be transported in (Dry, Refrigerated, Frozen)
